FLOW Analytics

Avenue Jean Monnet 4, 1348 Louvain-la-Neuve | info@flow-analytics.io | www.flow-analytics.io

80% of the global population will live in urban settings by 2050

Our mission is to shape frictionless urban environment

We are Flow Analytics

Our mission is to create seamless, thriving urban environments by providing cutting-edge mobility analytics solutions that help manage people and traffic flow across all modes of transportation.

We prioritize privacy and respect in everything we do, and our ultimate goal is to create a world where every individual can move freely and safely through the urban landscape.

A corporate venture

Part of AGC Group, we have the flexibility of a startup with the strength, the experience, and the geographical footprint of large corporate.

Flow Analytics is part of the Mobility business development platform of AGC Automotive Europe.

With its 55,000 employees across the globe, AGC is a group you can always count on.

In urban mobility

Traffic measurements, pedestrian counting, journey tracking – our solutions allow to understand and leverage the way people move within urban environments. We focus on areas where people live, commute and shop.

As a result, we aim at helping public and private entities to create urban spaces where people can move freely, smoothly and safely.

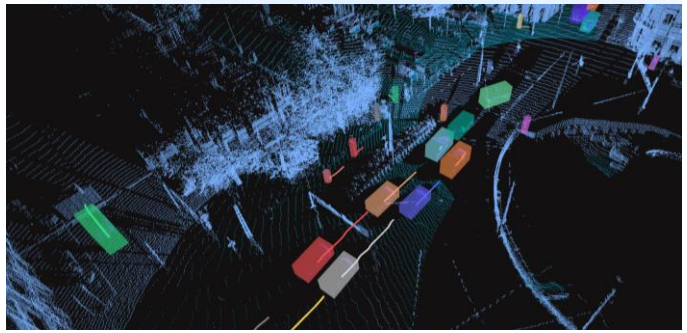
Our work

Improve. Protect. Leverage. urban mobility

Improve mobility

A better traffic management

Our off-the-shelf solution provides powerful analytic tools to better understand and manage traffic. Traffic analysis at an intersection, available parking slots detection, adaptative and smart intersections that detects cars, two-wheelers, and pedestrians, optimizing people flow.



Protect crowds

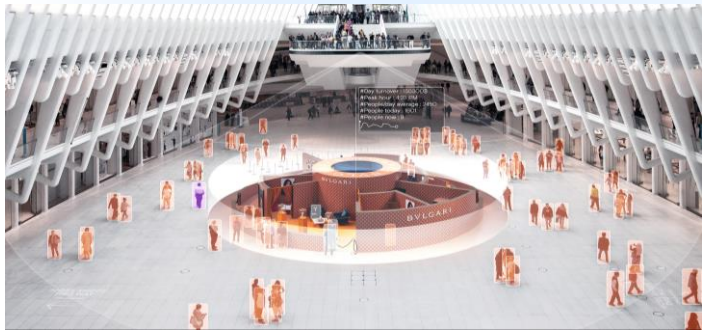
Early detection of issues and seamless experiences

Our technology can detect overcrowding before and send automatic alerts to security personnel. Moreover, by constantly measuring crowd behavior, organizers can get an instant overview on queues, occupancies and bottlenecks. 100% GPDR compliant, by default.

Leverage visitors' journeys

Understand and leverage the way people move

To increase the top line of your business, maximize the impact of a marketing campaign or reshuffle the floorplan of your shop. Take advantage of our LiDAR accuracy to deep dive into your shoppers' behaviors.



FLOW Analytics

The entire city is our playground

Any urban environment in which people mobility represents an opportunity for all stakeholders

Cities

Understand and improve traffic at intersections, foot traffic in commercial streets, or improve safety of your citizens during large events

Events

Organize security, anticipate queues at ticket offices, avoid crowd movement. Crete the best experience possible for your visitors

Transport hubs

Airports or train stations can better anticipate queues, optimize their floorplan, allocate staff dynamically, or raise security alarms

Retail

Shops and shopping malls want to improve customer experiences, optimize floorplan or measure the efficacy of a marketing campaign

Improving city mobility

Ever changing mobility patterns create source of struggle and opportunities for the cities

Automated traffic analysis and management

Multimodal analysis
Our off-the-shelf analytical tools differentiates between cars, trucks, two-wheelers and pedestrians to make sure your city can cope with the new mobility patterns.

Crosswalk and cycling paths supervision
Our crosswalk and cycling paths supervisions give full awareness to urban planners to enhance their safety by detecting and preventing accidents in real-time.

Parking spots detection
We improve urban mobility by organically identifying available parking spaces, reducing congestion, and emissions, while making parking hassle-free for residents and visitors.

Smart intersection
Our data-driven approach optimizes traffic signal timing and routing at intersections, ensuring efficient traffic flow and minimizing congestion, resulting in seamless urban mobility.

Enhance visitors' experiences

People counting and journey analytics. 100% privacy compliant, **by design**.

Data-driven decision making for all types of venues

Queue management

Better understanding and anticipating queues based on real-time measurements and data from other points on the site

People counting

Passage through an entrance or occupancy rate of an area of interest. Our counting solution is precise and reliable

Dynamic signage

Redirect your visitor flow based on real-time attendance to streamline the experience and avoid gatherings.

Staff allocation

Open a new counter or a new security line based on the attendance in the relevant zone or other upstream areas.

Safety

Automatic detection of people in high-risk areas. Unexpected gatherings

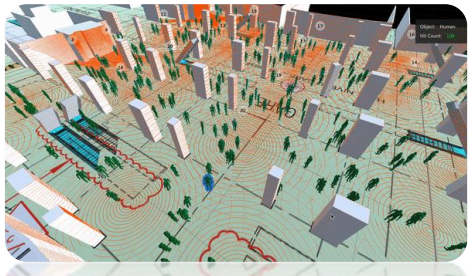
We deliver solutions from A to Z

Flow Analytics solution is fully integrated and has been implemented in various environments

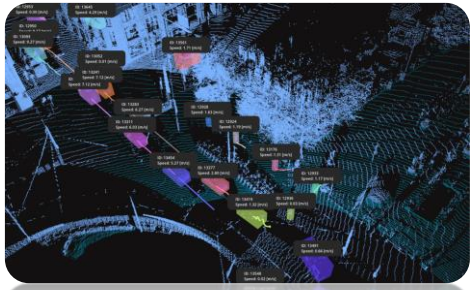
Simulation of your environment

To provide the most cost-efficient solution to your needs



Data collection and processing

Live and historical, we store all datapoints on the cloud so that you don't miss a beat. Always secured and privacy compliant.



Web based platform for actionable insights

Customize our web-based dashboard to maximize the value of the insights.

FLOW Analytics

Real-time or replay any historical data

Because we are privacy compliant by design, we can store and process as much historical data as we need to. Unlike cameras.
